

Span Occasional tables
Designed in 2024
by Cameron Foggo

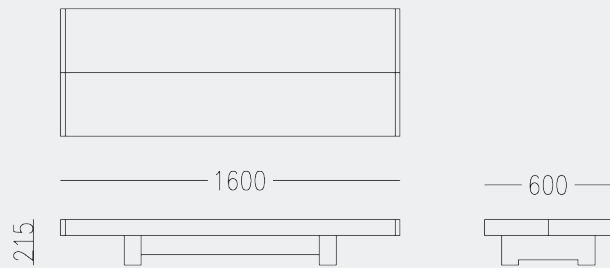

Span tables are composed of two timber slab forms resting on a robust base. The design features a minimal silhouette that is beautifully contrasted by the textured, rustic surface of the wood.

A balanced blend of simplicity and character. The designs focus on functionality, avoiding decorative elements and favouring construction and materials.

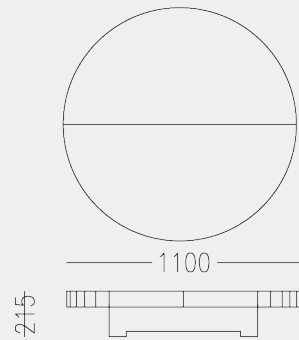

The Span occasional tables are made from solid American Oak, available in two stain colours in our Raw sawn finish.
